

ENERGY UNION

CELEBRATE, INFORM, ACT!

Energy Union is a pan-European project about fun, culture, self-help, cooperation, politics, environment, intelligence, energy, evolution.

Energy Union It's time to CELEBRATE

Energy Union is a campaign tour, and Coldcut (Ninja Tune) are on board with their new AV film. It's a show about Intelligent Energy as a solution to many global problems such as economic recession and climate change.

Intelligent Energy is about saving energy and producing it from clean, renewable sources. It also means a sustainable, energy-conscious lifestyle, green technologies and the right policies to support their implementation. Coldcut's new show harnesses the power of music and visuals to gatecrash parties and festivals all over Europe. The show is combined with policy forums and an interactive exhibition.

The campaign tour spans two years: it kicked off in Munich in July 2009. The final tour stop will take place in Brussels in March 2011. In total 24 tour stops are organised in 12 countries including Austria, Germany, Slovakia, Hungary, Czech Republic, Bulgaria, Slovenia, Croatia, Spain, UK, Netherlands and Belgium.

Energy Union Who we ARE

The campaign comprises a European network of organisations from different fields of expertise: Intelligent Energy experts, event promoters, environmental groups and multimedia artists.

Energy Union It's all about POLITICS

But Energy Union is about more than music and partying: as politics is the air we breathe, the energy we need, the trains we wait for, the tone of our countries' international behaviour - Energy Union also stimulates political discussions and actions.

Energy Union keeps you UPDATED
